

How to Use the Report Card Search Website

The Report Card Search Website allows you to quickly find and download Report Card files by entering their exact name in a search bar. Follow these simple steps to use the website:

1. Access the Website:

- Open the website using the provided URL <https://star-pdfs.onrender.com>

2. Enter the Report Card Name:

- In the search bar, type the exact name of the Report Card you're looking for. For example, to find `document1`, enter `document1`, `Document1`, or `DOCUMENT1`—the search is not case-sensitive.
- Note: The name must match the full filename exactly. Partial matches (e.g., `doc` for `document1`) will not work.

3. Search for the Report Card:

- Click the "Search" button next to the search bar.

4. View Results:

- If a Report Card with the exact name is found, a download link will appear (e.g., "Found: Download document1").
- If no Report Card matches exactly, you'll see an error message like "No Report Card found with that exact name."
- No Report Cards are displayed on the page until you perform a valid search.

5. Download the Report Card:

- Click the download link to save the Report Card file to your device.

Tips

- ✓ Case-Insensitive Search: You can use any combination of uppercase or lowercase letters (e.g., `Document2`, `document2`, or `DOCUMENT2` will all find `Document2`).
- ✓ Exact Match Required: Enter the full filename (without ``). For example, searching `document` won't find `document1`.
- ✓ Empty Search: If you click "Search" without entering a name, an error message will prompt you to enter a Report Card name.

- ✓ Troubleshooting: If a Report Card isn't found, double-check the spelling and ensure the Report Card exists on the server. Contact the site administrator if issues persist.

This website provides a simple, secure way to locate and download Report Cards without browsing through a list of files.
